Women in Green Technology towards a Sustainable Asia

August 27 ~ 29, 2009 The Westin Chosun Busan, Korea

On behalf of the organizing committee, it is with great pleasure that we invite you to 'BIEN 2009: INWES Asian Network', which will be held in Busan, Korea from August 27 to 29, 2009.

'BIEN 2009: INWES Asian Network' will integrate special sessions on Gender, Leadership,' Policy and Education and social programs for human networking as well as parallel scientific sessions. We hope BIEN 2009 will provide women scientists and engineers in Asia with an opportunity to share information on their multidisciplinary expertise so that the human network of not only Asia but all around the world can create a synergistic effect by converging the various technologies each participant is involved in.

The theme of this conference is "Women in Green Technology towards a Sustainable Asia". Increased global concerns for sustainable growth have drawn attention to the needs for research and development for Green Technology. The unprecedented expansion of interest during a relatively short period of time has pushed this field to the forefront of national policy and research in many countries, and the role of women scientists in this field is crucial and more important than ever. We wish that this conference can serve as an occasion to share information and knowledge based on this theme.

BIEN 2009 is the succession of the following two conferences: BIEN 2003 and ICWES13. 'BIEN 2003: 1st Women's Conference on BIEN-Technology' was held in Daejeon, Korea in 2003 as an international event where more than 500 women from over 20 countries attended. The INWES interim board meeting held at that time became the impetus for ICWES13 which was successfully held in Seoul, Korea in 2005.

We anticipate the success of BIEN 2009 and ask for your active participation and support once again. We look forward to welcoming you all at the 'BIEN 2009: INWES Asian Network' Conference.

Venue

BIEN 2009: INWES Asia Network will be held at the Westin Chosun Busan. The hotel is nestled on the scenic beachfront of Haeundae Beach which stretches 1.5 km long and serves as a famous vacation spot every summer. It has breathtaking natural surroundings, and is also within walking distance of the Nurimaru APEC house, the famous venue for the successful 2005 APEC Economic Leader's Meeting. The hotel has state-of-the art conference facilities, a fitness center and an in-door swimming pool and spa, both with an ocean view.

About Busan

Busan is the largest seaport and the second largest city in Korea. It has many places and activities for families, but is also a wonderful location for international conferences and conventions.

It is famous for its beaches, hot springs and events such as the city's international film festival held every fall. Its landscape includes a coastline with beaches, scenic islets and cliffs such as Taejongdae and

Oryukdo. It also has a lot of things to see such as the Busan Aquarium and the Busan Museum. Busan is accessible through Gimhae International Airport by connecting domestic flights or direct flights from several other Asian cities.
